6/7/16

Greetings,

I am writing to make a request regarding the alley resurfacing project.

In the past, water from heavy rains ran down the alley and then straight into my yard and basement. I had an asphalt bump installed along the edge of my driveway (along the side of the alley). This has diverted the water to keep it flowing down the alley. My request is that I want to maintain that flow. I hope that the asphalt bump will remain intact.

my address is: 2243 Buchanan St. NE

Thankyou,
marcia
