

Takoda Institute – City of Minneapolis & Community Tech Workshop 7/1

- **Learn about the Northstar Digital Literacy Standards** and how you can use them.
- **Try your hand at an assessment!** If you pass, you can receive a certificate.
- **We want your feedback** – As technology students your input is valuable to people in the adult education field. As technology continues to change, the Northstar team wants to adapt and improve. This tool was developed in the Twin Cities and is being used all over the country.
 - **What do you think:** Share your overall feedback on the standards (the list) and the assessment tool.
 - **What should be added:** Ideas for other standards or modules to include?
 - **Report glitches** you experience so the project team can prioritize what to update and when.

Learn it. Know it. Show it.

NORTHSTAR
BASIC COMPUTER SKILLS CERTIFICATE

The Northstar Digital Literacy Project defines basic skills needed to perform tasks on computers and online. The ability of adults to perform these tasks can be assessed through online, self-guided modules.

When individuals pass the assessments at approved sites, they can obtain the Northstar Digital Literacy Certificate. This provides a credential for employment and a sense of accomplishment. There is no cost to complete the online assessments.

The systems development life cycle (SDLC) also referred to as the application development life-cycle, is a term used in systems engineering, information systems and software engineering to describe a process for planning, creating, testing, and deploying an information system. The systems development life-cycle concept applies to a range of hardware and software configurations, as a system can be composed of hardware only, software only, or a combination of both.
