

This form serves to provide the City Council and IGR with key information on new legislative proposals.

<b>Name of Legislation:</b>	Resident email privacy
<b>Short Description. Please include a description of the current issue/problem, as well as any relevant historical background.</b>	The City allows individuals to sign up for e-mail notification for various reasons, such as agendas for council and other meetings, notification of a snow emergency, etc. There have recently been requests under the Data Practices Act for the lists of e-mail addresses that the City maintains. Constituents want to stay abreast of governmental actions, but not necessarily at the cost of losing privacy rights in their personal e-mail addresses. Individual's email addresses submitted to the City for notification of city services and activities should be private.
