

# PO BUILDING DESIGN | ENTRANCES & LENGTH OF BUILDING

The design and length of building wall combined with the location, design and number of entrances can significantly impact the adjacent pedestrian experience.

*Lines denote buildings or segments of buildings. Dots denote entrances*

Currently, the standard PO district requires that one principal entrance faces the public street. The Nicollet Franklin PO requires that a no single commercial use shall extend more than 120 feet along the first floor facade.

*Lines denote buildings or segments of buildings. Dots denote entrances*

A potential option is to consider requiring an entrance or limiting the length of ground floor commercial uses to encourage design that reflects the existing built character.
