

Buy them. Use them. Don't put them in the trash.

Fluorescent bulbs use 75% less energy
than incandescent bulbs.

They're good for your
pocket book and good for
the environment *when you
dispose of them properly.*
Use compact fluorescents
and save \$ on your
electric bill while you
fight global warming.

Fluorescents contain a small
amount of mercury. It is
illegal to put them in the trash.
